Domestic Gas Connections

Do you use oil, bottle gas or solid fuel to heat your home?

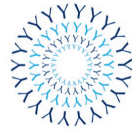

There are more than 2 million homes in the UK that are not connected to the mains gas network. In comparison to oil or coal, gas is still one of the most cost effective domestic fuels.

If your street has a gas supply, you will be able to access funding towards a gas connection whatever your circumstances.

Depending on the area you live in, or if you receive certain benefits or are over 70 years of age, you may even be eligible for a free gas connection with a discounted central heating system.

Yorkshire Energy Services - Freephone: 0800 052 7496

Yorkshire
Energy Services

What we do:

Yorkshire Energy Services will arrange a gas connection with a mains gas provider on your behalf. In most cases this will be free of charge. If you are not eligible for any grants we can still source funding and guarantee that your connection will be no more than £800.

We will arrange for one of our carefully selected, gas safe registered installers to provide you with a **free no obligation quote** for a gas central heating system whilst we negotiate funding to bring the cost down even further. Loans* are also available to help spread the cost. (*Subject to circumstances)

*'The price you are quoted is the price you pay...
there are no hidden extras!'*

What you do:

Once your gas supply is connected, Yorkshire Energy Services can help you choose a gas supplier and advise on installing a meter box.

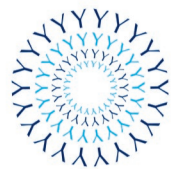

We will manage the whole process at your convenience so you can sit back and relax...it really is hassle free!

Contact Us:
